

$$m\angle 1 + m\angle 3 = m\angle 5$$

3. The measure of each exterior angle of a triangle equals the sum of the measure of its two remote interior angles.

Obtuse: _____	Scalene: _____
Acute: _____	Isosceles: _____
Right: _____	Equilateral: _____
Category 1	Category 2

1. The sum of the interior angles of any triangle is 180 degrees.
2. Types of Triangles: (When naming, choose one from each category)

Geometry 3-3 Notes (Triangles)

Geometry 3-3 Notes (Triangles)

1. The sum of the interior angles of any triangle is 180 degrees.
2. Types of Triangles: (When naming, choose one from each category)

Category 1

Category 2

Right: \_\_\_\_\_

Equilateral: \_\_\_\_\_

Acute: \_\_\_\_\_

Isosceles: \_\_\_\_\_

Obtuse: \_\_\_\_\_

Scalene: \_\_\_\_\_

3. The measure of each exterior angle of a triangle equals the sum of the measure of its two remote interior angles.

$$m\angle 1 + m\angle 3 = m\angle 5$$
